Climate change, forced migration and
security implications: a new challenge for
global solidarity?

Andrea Tkáčová

Thanks to:

Dr. Anja Mihr, for her excellent supervision and valuable comments,

My parents, brother, grandparents and Tim for their continuing support and love.

Abstract

Human migration will be one of the consequences of climate change, although there are still problems with establishing the causal link, lack of scientific certainty and lack of consensus on a proper definition of climate migrant. Migration involves complex patterns of multiple causality, in which environmental factors are closely linked to economic, social, and political ones.

Even if a definition is agreed upon, determining how climate migrants are best protected remains unclear and leads to a debate within the international community over issues of responsibility and sovereignty. My thesis will explore the current legal status of climate migrants under international law and will seek to answer the question whether human security and human rights approach to climate change can help to advocate their rights.

Climate migration might have some security implications, particularly through the concept of human security. Concepts of human rights and human security are interrelated and mutually reinforcing. I will argue that linking international climate change law with human security and human rights could help to better understand needs of climate migrants and to force the international community to sooner adopt effective climate change policy.

Table of contents

1. Introduction	5
2. Climate change and displacement.....	8
2.1 Definition of a climate migrant.....	9
2.2 Climate Migration as adaptation.....	11
2.3 The specific problems of climate migrants fleeing from sinking islands.....	14
3. Climate change and security.....	19
3.1 Traditional understanding of state security.....	19
3.2 Human security	20
3.3 The concept of environmental security as part of human security	23
3.4 The role of the Security Council.....	26
3.4.1 Responsibility to protect.....	26
3.4.2 Threat to peace and security.....	29
3.4.3 Secretary General Report on climate change and security	31
4. Climate migrants in international law.....	35
4.1 Relevant principles of international law.....	35
4.2 Refugees, internally displaced persons, or migrants?	37
4.3 Climate Change regime	41
4.3.1 UN Framework Convention on Climate Change (UNFCCC)	42
4.3.2 Kyoto Protocol	44
4.3.3 Recent developments: Copenhagen and Cancun	45
5. Claiming human rights violation of climate migrants.....	48
5.1 Right to clean environment as a precondition for other human rights	49
5.2 State obligations.....	51
5.3 Extra territorial jurisdiction	52
5.4 Additional Problems with human rights approach to climate change.....	55
5.4.1 Inuit case study.....	57
6. Comparison with European level and ways ahead	62
6.1 Overview of relevant instruments in Europe.....	62
6.2 Case law of European Court of Human Rights.....	66
6.3 Towards future Solutions : New Convention on environmentally displaced persons?	67
7. Conclusion.....	71
Bibliography.....	74
